The Association of American Universities Data Exchange (AAUDE) is a public service organization whose purpose is to improve the quality and usability of information about higher education. Membership is comprised of AAU institutions that support this purpose and participate in the exchange of data/information to support decision-making at each member's institution. Rutgers has been an active participant in the exchange for the last 15 years.

The data exchanged and reports prepared by AAUDE include both public and confidential topics. The following partial list are examples of the data items that are exchanged on an annual basis by AAUDE member institutions. These data are used for comparative and longitudinal analyses.

Students
