## Welcome to the Childhood Studies Program at Rutgers-Camden

Childhood Studies is the theoretical and methodological study of children and childhood within historical, interdisciplinary, multi-cultural, and global contexts. The degree programs prepare scholars capable of innovative interdisciplinary research in childhood studies and leaders in child-related social practice and policy.

We aim to transform the study of children and representations of them

- 1) through interdisciplinary dialogue and synergy, and
- 2) by placing children themselves at the center of investigation, whether by listening to children's own unique experiences and voices or by creating appropriate methodological tools for understanding their uniqueness.

*The Department of Childhood Studies Program at Rutgers-Camden  
is seeking applications for*  
**ASSOCIATE/FULL PROFESSOR in CHILDHOOD STUDIES**
