Welcome

Welcome to the Rutgers University Cell and DNA Repository (RUCDR) website. RUCDR is the largest university based repository in the world. We are located on the Busch Campus of Rutgers University, Piscataway, New Jersey.

Our Mission

Rutgers University Cell and DNA Repository (RUCDR) plays a key role in research aimed at understanding the genetic causes of common, complex diseases. RUCDR activities will enable gene discovery leading to diagnoses, treatments and, eventually, cures for these diseases. RUCDR assists researchers throughout the world by providing the highest quality biomaterials, technical consultation, and logistical support.

Order

You can order biomaterials and apply for phenotypic/genotypic data, depending on the project.

[Click here](#) to view available materials and ordering requirements for each repository collection.

Contact Information

To contact us about specific projects, or to request materials, or to follow up on specific questions/requests, please use our [RUCDR Web Portal](#): <http://rucdr.rutgers.edu>.

Please contact [Dana Witt](#) if you have difficulty accessing the portal.

To learn more about RUCDR and its services, please contact us at:
 Phone: 732-445-1498
 Fax: 732-445-1149
 Address: Nelson Biological Laboratories,
 604 Alison Road,
 Piscataway, New Jersey 08854.
 Email: jay@biology.rutgers.edu
