Subject: Rutgers Signs Microsoft Campus Agreement
Members of the Rutgers Community:

The Office of Information Technology is very pleased to announce that Rutgers has signed a Campus Agreement with Microsoft for the following products:

- Windows XP Professional Upgrade,
- Windows Vista Enterprise Upgrade (available March 1)
- Enterprise level of Office for Windows and Macs includes:
 - Office Professional 2003 for Windows
 - Office 2004 Professional for Mac
 - Office Enterprise 2007 (available March 1)
- Core Client Access License (CAL) includes Windows, Exchange, SMS, and SharePoint
- SQL Server Client Access Licenses

These products are available free of charge to all Rutgers' faculty and staff for use on University owned equipment. In the near future, Work-At-Home versions will also be available on CDs for a minimal cost. All faculty and staff who are interested in obtaining these products should consult with their local Unit Computing Specialist prior to installation / download. If the department does not have a local computing support person, the OIT Microcomputer Support Services Group (732-445-6950) may be consulted for free advice and guidance. Additionally, your local OIT campus help desk may be consulted for advice. Having a Campus Agreement in place will provide significant cost savings for the University and is closely aligned with the objectives of the President's Committee on Efficiency and Entrepreneurship. For further information on the Microsoft Campus Agreement, Microsoft Office, and Vista, please visit: <https://software.rutgers.edu/>
