Welcome to the Rutgers University Marine Field Station

The Rutgers University Marine Field Station (RUMFS) is a field facility of the Rutgers University Institute of Marine and Coastal Sciences (IMCS). It is a working lab with graduate and postdoctoral level research ongoing year-round. RUMFS is uniquely situated across from the Little Egg Inlet in the Mullica River-Great Bay estuary, one of the most pristine estuaries on the east coast.

For additional information about our facilities and current research please choose from the links to the left.
