The Office of Instructional and Research Technology (OIRT) provides coordination for use of Information Technology throughout the University in support of instruction and research. As part of the [Office of Information Technology](#), OIRT can meet with departments to review research and instructional IT services at Rutgers.

[OIRT staff](#) are available to work with individual instructors and researchers, as well as with departments and other units. Requests for information about OIRT services and activities are welcome. Please send them to the Director, Charles Hedrick, at hedrick@rutgers.edu.

[Sakai's Collaboration and Learning Environment](#) is an open-source Course Management System which is being developed by a consortium of universities.

interesting things at
Rutgers and elsewhere

WHAT'S COOL...?

quick overviews of technologies
both new and old, with pointers
to additional information and
resources

WHAT IS... WHAT'S GOING ON...?

events at Rutgers and beyond
that we think are of interest

HOW DO I...?

goal-based help, from getting
a grant to engaging students
in class
