SECTION III-D

SEVEN-YEAR CAPITAL IMPROVEMENT PLAN

FISCAL 2008 – 2014

Rutgers, The State University
The University of Medicine and Dentistry of New Jersey
New Jersey Institute of Technology
Rowan University
HIGHER EDUCATION

Overview
The New Jersey system of higher education is committed to enabling all people to achieve their maximum potential, fostering democratic principles, improving the quality of life, and supporting the State’s success in a global economy. By placing teaching and learning at the core of its mission, the higher education system in New Jersey prepares individuals for fulfilling lives, rewarding careers, and lifelong learning; through research, colleges and universities enhance teaching and learning, increase knowledge, improve the human condition, and enhance the economy. Many institutions also provide community service, work with local schools and organizations, sponsor recreational and cultural events, and offer technical assistance to small businesses.

In addition to promoting personal and intellectual growth, the higher education system bestows economic benefits to the State. By providing an educated and skilled workforce, developing new technologies through research, and devising new partnerships with private enterprise, the system attracts new businesses, creates jobs, and promotes economic growth. New Jersey has more scientists and engineers per capita than any other state and is an international leader in corporate research and development. Overall, the State has a higher than average number of executives, administrators and managers, and a lower than average concentration of workers in service occupations.

The Higher Education Restructuring Act of 1994
The Higher Education Restructuring Act of 1994 created the current system of higher education in New Jersey. It is a tripartite structure consisting of the Commission on Higher Education, the New Jersey Presidents’ Council, and the higher education institutions.

The Commission on Higher Education
The purpose of the Commission on Higher Education is to coordinate, plan, and develop policy, and serve as an advocate for the State’s higher education system in concert with the New Jersey Presidents’ Council. The Commission conducts research and coordinates statewide accountability efforts to provide data and programs on higher education performance, programs, and initiatives. This enhances the capacity and competitiveness of the institutions, increases access to higher education for all socio-economic groups, and improves linkages between secondary schools, higher education facilities, and two-year community colleges.

The Presidents’ Council
The Presidents’ Council is an advisory body composed of the presidents of all public colleges and universities and those independent institutions that receive State aid. The Council makes recommendations on new programs, budgets, student aid levels, licensure, and the statewide higher education plan. It also advises the Administration, the Legislature, and the Commission on Higher Education on specific issues affecting higher education.
Colleges and Universities
The higher education system is comprised of 12 four-year public colleges and universities, 19 community colleges, and 26 private institutions. The State’s 12 senior institutions operate autonomously, governed by their boards of trustees. Each of the senior public institutions has clearly defined missions that offer diverse opportunities to students. These include undergraduate, graduate, and professional degree programs, research facilities, academic support assistance, non-credit offerings, and training and continuing education programs. In addition to promoting their educational missions, colleges and universities provide cultural and recreational activities to communities through theater performances, concerts, guest speakers, and sports events.

Community Colleges
The community colleges play a vital role in the higher education system by providing two-year associate degrees in specific fields, continuing education programs, and skill improvements options. For many of their students, the community colleges also serve as a gateway to higher-level degrees through transfers to four-year institutions.

Student Assistance Programs
New Jersey is dedicated to the principle that higher education should be accessible to all – regardless of their socio-economic status. Consequently, financial assistance is provided under the auspices of the Higher Education Student Assistance Authority, including need-based and merit-based funding, specialty grants, federal student loans, and a tax-free saving incentives program for student attending colleges in New Jersey.

These are university-wide projects that involve ADA, environmental, life and fire safety. Multiple buildings at the university were constructed prior to implementation of the Americans with Disabilities Act and must be renovated for compliance. Environmental, life and fire safety projects are required for compliance with regulations mandated by state and federal governments.

A new academic building for the Rutgers Business School at Newark (RBSN) is necessary to upgrade its teaching, research and outreach programs and to allow the school to remain competitive with peer institutions. Consistent enrollment increases in both the undergraduate and graduate programs at the business school have contributed to a desperate need for additional classrooms and program space. The University plans to purchase and renovate space (a condominium interest) for the RBSN in One Washington Park, Newark, NJ. The RBSN relocation from its existing facility will free up much needed classroom space for other programs in the Management Education Center, Engelhard and Ackerson Halls.

The construction of a new 120,000 GSF lab and office facility on the Cook Campus will house Rutgers' world-renowned Geology Department and expand its top-rated Institute of Marine and Coastal Sciences. Envisioned as an expansion of the existing Marine and Coastal Sciences building, this project is vital to the university’s continued progress in the areas of earth, ocean and planetary sciences and the direct provision of services, through these programs, to New Jersey’s marine and ocean-based industries. The project is

A new, state-of-the-art research lab and office facility will be built to house Rutgers' Department of Nutritional Sciences (first in the nation) and additional programs, relating to nutrition and health. The building will serve as a centerpiece for major multi-disciplinary and collaborative multi-institutional initiative in nutrition, encompassing fields from molecular genetics and physiology, to pharmaceuticals and nutraceutics, to public policy and education, to outreach to communities and districts throughout the State. The goal is to position Rutgers as "the nutrition university," focused on research, education, economic development and community service. The Nutrition Research Facility is to be built on the Cook Campus as a 80,000 gsf addition to the Center for Advanced Food Technology building, allowing for the consolidation and relocation of the nutrition department from Thompson Hall and Davison Hall.

<td>The Rutgers School of Business at Camden (RSBC) has an outstanding cadre of faculty and is highly regarded by the southern New Jersey business community, but the RSBC currently shares facilities with other disciplines in the areas of math and science. RSBC is the only school on the Rutgers Camden campus that does not have its own building. To provide the new dean with the ability to move the School forward, a building designed specifically for instruction of business courses, with case study rooms and interactive computerized classrooms is critical. A new 96,000 gsf building is proposed for the School of Business on the Camden campus.</td>

| The Faculty of Arts and Sciences in Camden intends to introduce graduate programs in Computational Sciences in the near future. These programs will require space specifically designed for instruction and research in the field. With the construction of a new Business Building, the existing Business and Science Building can provide the necessary space for the Computational Science programs, but that space will require major renovations. |

</table>

**Operating Impact:**
- **Increase:** $0
- **Decrease:** $0

A complete renovation of the Medical Science Building, including the electrical, plumbing, security, data network and HVAC systems. A complete renovation of the MSB is estimated to cost upwards of $328 million. If a large scale renovation of the MSB is not feasible for the University at this time, we would like to work with Facilities, Planning and Construction to see if a system-by-system approach could be considered.

### UMDNJ - NEW JERSEY DENTAL SCHOOL

**A-LEVEL STERILIZATION UNITS/RECORD ROOM**

Sterilization Units are original with the building (1976). Current maintenance contracts are expensive and unit down time is more frequent. New sterilization equipment will be installed in A-Level of the new NJDS Oral Health Pavillion. In addition to sterilization, a new Patient Records Room will be installed to provide a patient charts retention area.

Expansion of the C & D Levels of the New Jersey Dental School by 26,550 square feet would add a sufficient amount of space enabling the school to make significant progress. This option includes clinic renovations, electrical upgrades, networking infrastructure improvements, atrium glass repair, HVAC upgrades and partial monies for interior renovations. A reassignment of Academic Media space to the Dental School would also result. This space would be used for academic and office space expansion.

New Jersey Dental School proposes the development of a Center for Advanced Clinical Technology. This Center will serve as the home base for all activities related to advanced clinical technology, including implant therapy; CAD/CAM technology such as Procera; and other new emerging technologies. The Center will enable both UMDNJ-NJDS pre-doctoral and post-doctoral students to gain a hands-on clinical experience using these new materials and methods, as well as serve as a facility for providing hands-on continuing education.

**Operating Impact:** Increase: $0  Decrease: $0

Currently, we use a common hallway as our Dental Mechanical Shop. It is approximately 10 feet by 12 feet, much too small to complete our repair work. The entrance to an electrical switch gear room is inside of our shop, therefore we can not lock the shop. Ideally, we need a space approximately 20 feet by 20 feet. Our parts would be stored on several shelves with bins, so we could maintain an inventory and set reorder points. We would need 2 workbenches with storage above and below, a drill press, vise and grinder, compressed (drive) hot air, hot and cold water, vacuum and natural gas.

The New Jersey Dental School is housed in a 30-year-old building with limited space and facilities. While the School has recently opened three new lecture halls, there is no dedicated quiet space for students to learn and study. Although some study space is available in the George Smith Library, it is not adequate for the student body. A separate, dedicated space suitable to accommodate students is required to maximize the potential of students to achieve.

**UMDNJ - NEW JERSEY DENTAL SCHOOL**

The New Jersey Dental School must upgrade its voice infrastructure. To date, not all offices have been upgraded to the Meridian I phone system even though the University has already standardized on the PBX phone system. The new infrastructure would eliminate the antiquated analog/key telephone systems, and replace them with state-of-the-art digital technology, providing the user with many enhancements such as voice mail, conference call, and intercom. Justification: Existing equipment is old and costly to maintain. New equipment will interface with the University-wide data network.

The equipment will aid clinical skill development for the physical therapy, physician assistant, nurse midwifery, respiratory therapy, psychosocial rehabilitation, clinical nutrition and dietary internship allied health programs. Also useful for SHRP research activities. The digital counseling equipment will be used for the production of digital audio and visual materials and for demonstration and teaching of interpersonal counseling skills. The other equipment is for clinical simulation. Students will be able to practice needed skills before they are asked to administer direct patient care. The equipment will enable instructors to gauge student's proficiency.

The School of Nursing is in critical need to have its own building in order to provide sufficient space to accommodate its existing and planned academic programs, state-of-art learning laboratories and classroom facilities, research space, clinical practice space, faculty and administrative offices, and space to house various School of Nursing's Centers. The current space in the SSB Building is no longer adequate for its existing program needs and future growth. The need for space has reached crisis proportions and constitutes a serious program development inhibitor, constricting the School's ability to increase enrollment, develop new, needed academic and clinical programs and expand the research programs of the School.

The Chandler Health Center is in need of a management information system (MIS) for managing and archiving data for clinical management of patient services. This data would include, but not be limited to, referrals, patient encounters, and histories; provider-specific data on productivity, medications and tests ordered, and ancillary referrals; patient specific data needed for building a patient database and maintaining scheduling and referral information; and outcome data for the purposes of tracking clinical results and patient satisfaction. This system would be established and configured as a local area network for maintaining clinic-wide information management. Costs of such a system, including installation and training, are estimated to be approximately $324,000.

Essential to the growth of the research and clinical enterprises at RWJMS is the establishment and expansion of state-of-the-art core facilities. These cores include: Proteomics Core, Imaging Core, Transgenic Core, Electron Microscopy Core, Good Manufacturing Practice Core, General Clinical Research Center Core and Chemical Biology Core. These cores will provide services such as manufacturing of pharmaceutical and biotherapeutic agents for testing new drugs in patients; electron, multiphoton and confocal capabilities to image cells; development of transgenic animals for use in scientific experiments; and the ability for protein and DNA analysis.

With the completion of the Human Genome Projects, emphasis is shifting from the study of the gene to that of the protein, and thus to the science of Proteomics. It is believed that through Proteomics, new disease markers and drug targets can be identified that will help design products to diagnose, treat and prevent disease. The research of the clinical and basic scientists at the Medical School would be greatly enhanced if they had access an expanded Proteomics/Functional Genomics core facility. This facility would require a special building to house the instrumentation and the technical and support staff of approximately 20,000 square feet.
Robert Wood Johnson Medical School is developing a planning process to look at adding approximately 50,000 sq. ft. to the Clinical Academic Building in New Brunswick. Additional clinical and academic space is needed to support clinical department expansion. A rough estimate of the costs to construct this expansion is approximately $20,000,000.

Robert Wood Johnson Medical School is in the planning stages to construct a 71,420 sq. ft. facility to house the Cardiovascular Institute of New Jersey (C.V.I.N.J.). Currently, plans call for the CVINJ to occupy 2 floors within the proposed Stem Cell Institute of N.J. building: a research floor and a clinical floor.

Replacement of equipment will enable the current vivariums in Piscataway and New Brunswick to meet the increasing needs of the School's researchers. In addition, funds are required to support vivarium equipment in both the Research Tower on the Piscataway Campus as well as the vivarium within the new Child Health Institute of New Jersey and the Stem Cell Institute of New Jersey.

The Research Tower on the Piscataway campus of RWJMS was built in 1966 and only limited areas of the building have been renovated since that time. As changes in science require a more sophisticated infrastructure to support the research, and as time has taken its toll on the operational capabilities of the building and the animal facility, it is imperative that the research tower be renovated to meet these needs. Laboratories on all eight floors of the building must be renovated and the three lecture halls that support the teaching of the first two years of medical school must be made state-of-the-art.

Space within the Medical School's Medical Education Building (MEB) will be renovated to accommodate faculty offices, research and translational laboratories and administrative space in support of the initial faculty and staff recruitments. A total of 4,430 sq. ft. will be renovated. The administrative space will be located on the MEB 1st floor, near the RWJUH atrium, allowing the institute to be prominently displayed. The faculty recruited into the MEB space will be in close proximity to the many existing core facilities within the Medical School. The laboratory and translational research space provided by the 6th floor renovation will allow for the immediate recruitment of stem cell scientists, who will begin to develop their basic and translational research programs, in an existing research-supportive environment.

There is an immediate need for a cellular imaging core for research conducted by stem cell research scientists. The ability to visualize the dynamics of structures within cells and cells within developing tissue is critical. Digital deconvolution microscopy uniquely provides the highest possible resolution, as well as allowing rapid time-lapse observations to study ongoing processes in living cells. Another key technology will be the two photon laser scanning microscopy, which will allow for imaging chemical and structural dynamics in intact cells and tissue.

Operating Impact: Increase: $500  Decrease: $0

A Human Simulation Center will provide a variety of medical education technologies, including computerized mannequins, virtual reality and computer-based training, and cadaver/animal simulation. Simulation meets the pressing need for basic and advanced training for physicians, nurses, and allied health professionals. Simulation technology also facilitates team training and crisis resource management for both clinical and non-clinical personnel. Simulation is particularly well suited to surgical, anesthesia, nursing and emergency/critical care education.

**Operating Impact:**  
- Increase: $0  
- Decrease: $0

A properly designed central repository for servers and storage pools at each of the campuses is required to meet the IT needs of the school. The development of collaborative opportunities leading to translational research requires an environment that supports access to the data centrally. Currently, there exists no location at any of the campuses that can adequately house Server/SAN equipment. Additionally, due to the acquisition of increasingly large data sets, storage of data in one campus will diminish network performance, thus requiring the development of data centers in a distributed model.

RWJMS would benefit from a new e-mail/messaging environment by introducing efficiencies in the scheduling process, providing voice-over IP features through e-mail, minimize support needs and more. The current UMDNJ e-mail system is fragmented and is supported through various platforms and support mechanisms. Additionally, there exists no unified messaging system leading to countless hours of administrative work and delays in the appointment process.

The Eric B. Chandler Health Center is a federally qualified health center run by the Robert Wood Johnson Medical School. The Center provides care for indigent patients and provides important educational experiences for medical students and residents. Patient visits have increased to the point whereby the Center has outgrown its current facility. A new facility will enable the center to meet the patient demand and allow the Center to more efficiently deliver care to its patients and educational experiences to its students and residents. The new facility will be 50,000 sq. ft. and a rough estimate of the cost is approximately $20,000,000.

This facility will include MALD-TOF and electrospay mass spectrometry, microanalytical HPLC, 2-D gel automatic electrophoresis systems, and microarray modes. The facility will be used by a number of investigators for identification of peptides and other biopolymers derived from proteins and protein-nucleic acid complexes. These capabilities are essential for the performance of a number of projects currently underway, or being contemplated for outside funding. In addition, it is essential to have these capabilities in order to stay ahead of current research.

This would be considered a core facility and house a number of pieces of equipment that is required for mass spectroscopy. Several federally funded laboratories in our Science Center require the analysis of proteins derived from the systems under study. This facility would be used to analyse protein, protein modifications and related phenomena to promote an understanding of protein biochemistry.

Another core facility that would house equipment needed by a number of basic science laboratories at SOM to study various aspects of cell biology. These would include cell cycle analysis, signal transduction, cell development and related aspects. SOM Basic Sciences does not have any of this equipment, nor do the faculty have ready access to this equipment. As the Basic Science faculty grows, the need for this equipment will be even greater. A fiscal investment at this level will be a first for us in terms of expanding our limited infrastructure. These needed items will also aid tremendously in our recruitment effort to attract additional, competitive and federally funded investigators to our School.

**Operating Impact:**

**Increase:** $0  
**Decrease:** $0

The life sciences contribute more than their share to some of the most vexing computational problems. The class of Grand Challenge Problems whose solution is amenable in whole or part to computer simulation will also require the most powerful resources available at any point in time. AST provides the community computational support for some large and important research problems. These facilities, while still useful, must now be complemented with more scalable, lower cost approaches if UMDNJ is to remain competitive in attracting faculty, grant dollars and building a cybercomputing infrastructure capable of supporting the type of collaborative research which is increasingly becoming the norm.

UNIVERSITY WIDE

ENTERPRISE MANAGED STORAGE SERVICES
LOCATION: UNIVERSITY-WIDE

Dept Priority 6
Project ID: 75B702
Project Type Code: D03  Project Type Description: Acquisition-Computer Equipment & Systems

| General  | $990 | $874 | $29 | $29 | $58 | $0 |
| Sub-Total| $990 | $874 | $29 | $29 | $58 | $0 |

Operating Impact: Increase: $0  Decrease: $0

The management of data from collection throughout its lifecycle of synthesis into information and finally knowledge cannot be taken for granted or left to chance. In fact, Federal granting agencies keenly recognize and assume that institutions already have or are building into their infrastructure the facilities to manage data throughout its useful life and make it available for the collaborative efforts that are becoming the norm in attracting grant dollars. Rapidly evolving technologies such as Internet2 and LambdaRail are demanding far more synergistic approaches and connections between computers, storage, networks and people. Institutions that do not recognize these trends will be significantly disadvantaged in the funding arena for high-end, collaborative research.

UNIVERSITY WIDE

HIGH PERFORMANCE COMPUTING: GRID MANAGEMENT
LOCATION: UNIVERSITY-WIDE

Dept Priority 7
Project ID: 75B703
Project Type Code: D03  Project Type Description: Acquisition-Computer Equipment & Systems

| General  | $13  | $9   | $1   | $1   | $2   | $0 |
| Sub-Total| $13  | $9   | $1   | $1   | $2   | $0 |

Operating Impact: Increase: $0  Decrease: $0

Grid computing allows intramural and extramural sharing of existing computing resources in a structured and managed way. This technology is recognized throughout the industry as an important and economical way to better deploy existing resources. Many problems in the scientific realm are amenable to Grid computing. Although presented here as a research initiative, this technology has broad implications in administrative and other computing areas.

UNIVERSITY WIDE

STORAGE AREA NETWORK (SAN) UPGRADE
LOCATION: UNIVERSITY-WIDE

Dept Priority 8

MEDIASITE-UMDNJ WEBCASTING
LOCATION: UNIVERSITY-WIDE

Dept Priority: 9
Project ID: 75B705
Project Type Code: D03 Project Type Description: Acquisition-Computer Equipment & Systems

| General: | $542 | $112 | $77 | $78 | $275 | $0 |
| Sub-Total: | $542 | $112 | $77 | $78 | $275 | $0 |

Operating Impact: Increase: $0 Decrease: $0

Mediasite ML 440 EX recorder captures live presentations/training/courses in real time, merges multiple inputs (e.g. video, voice, PowerPoint, medical device data, etc.) into a synchronized rich media stream that can be viewed live or on-demand through standard web browsers or listened to on iPODs. Appliance has a travel case for easy setup in multiple locations.

UNIVERSITY WIDE

SECURITY INFORMATION MANAGEMENT SYSTEMS (SIMS)
LOCATION: UNIVERSITY-WIDE

Dept Priority: 10
Project ID: 75B706
Project Type Code: D03 Project Type Description: Acquisition-Computer Equipment & Systems

| General: | $1,069 | $397 | $112 | $112 | $448 | $0 |
| Sub-Total: | $1,069 | $397 | $112 | $112 | $448 | $0 |

Operating Impact: Increase: $0 Decrease: $0

This Security Information Management System (SIMS) is a technical approach that will give IST staff the ability to view the relationships between security events and incidents and to obtain and correlate the system logging information available from our firewalls, security and server assets allowing us to better diagnose our information security posture, and to provide a measured response to emergent network security issues.

UNIVERSITY WIDE

INTERNAL VULNERABILITY ASSESSMENT (NESSUS)
LOCATION: UNIVERSITY-WIDE

Dept Priority: 11
Project ID: 75B707
Project Type Code: D03 Project Type Description: Acquisition-Computer Equipment & Systems

| General: | $36 | $19 | $3 | $3 | $13 | $0 |
| Sub-Total: | $36 | $19 | $3 | $3 | $13 | $0 |

Operating Impact: Increase: $0 Decrease: $0

Securing our network requires an understanding of the weaknesses in our network and server systems. NESSUS is a vulnerability scanner that uncovers these weaknesses. Additionally, NESSUS provides a severity level for these weaknesses and recommends fixes.

ENTERPRISE PROXY SERVICES
LOCATION: UNIVERSITY-WIDE

Dept Priority: 21
Project ID: 75B717
Project Type Code: D03  Project Type Description: Acquisition-Computer Equipment & Systems

General:                       $1,732  $530  $200  $200  $802  $0
Sub-Total:                     $1,732  $530  $200  $200  $802  $0

Operating Impact: Increase: $0  Decrease: $0

A proxy server is a server that sits between a client application, such as a Web browser, and a real server. It intercepts all requests to the real server to see if it can fulfill the requests itself. If not, it forwards the request to the real server. Proxy Services allow us to establish a secure and/or a controlled connection to resources which are behind a firewall, but which need to be accessible from the internet. A typical usage of a forward proxy is to provide Internet access to internal clients that are otherwise restricted by a firewall. A typical usage of a reverse proxy is to provide Internet users access to a server that is behind a firewall.

UNIVERSITY WIDE

HIGH BANDWIDTH WIDE AREA NETWORK UPGRADE
LOCATION: UNIVERSITY-WIDE

Dept Priority: 22
Project ID: 75B718
Project Type Code: D03  Project Type Description: Acquisition-Computer Equipment & Systems

General:                       $2,989  $427  $427  $427  $1,708  $0
Sub-Total:                     $2,989  $427  $427  $427  $1,708  $0

Operating Impact: Increase: $0  Decrease: $0

The UMDNJ Wide area network was last upgraded in 1999 and is based on a legacy Asynchronous Transfer Mode, (ATM) architecture. The network hardware platforms to which the campuses are connected, have minimal redundancy and are not designed to process and transport network traffic, generated in today’s computing environment. Additionally, this legacy architecture prohibits the creation of potential hot backup sites with the institution and across campuses, and does not meet the computing needs of University researchers and high-end computer users. The legacy network hardware platform will be upgraded to new high speed routers and switches. The Wide Area Network Topology will be upgraded from ATM to a DWDM, (Dense Wave Division Multiplexing) environment, which will provide the capability to provide up to 32 ten gigabit connections between campus locations. The network topology has been designed in a ring format to ensure that the maximum amount of redundancy is achieved. The Intranet and Extranet network up-time and availability will increase to 99.9999 percent.

The benefits derived from operating and maintaining an Electronic Health Record cannot be recognized unless clinicians embrace and use current Ambulatory Electronic Medical Record technology. Expansion of the Electronic Medical Record will make the system more attractive and hence, foster greater use of these systems. This, in turn, increases the richness of clinical data within these systems, which in turn, spawns growth and acceptance of Electronic Health Record technology.

</tbody>
</table>

Replacement of galvanized and victolic water main piping and fittings, which have exceeded their serviceable life. There have been 3 failures on campus in recent history, one near catastrophic event due to electrolysis between the victolic and copper connections. In addition, the system requires zone valves to permit isolating the floors, if needed. Failure did and would compromise life/safety and cause major flooding, interruption of service and increased operational costs for research and education.

### PHYSICAL PLANT - NEWARK

#### REPLACE ACID WASTE NEUTRALIZATION SYSTEMS

LOCATION: NEWARK-MED. SCIENCE BLDG.

<table>

The elevator in the Smith Library is in critical need of replacement. Installed when the Library was built in 1975, the elevator is poorly lit and requires frequent repair. Disabled patrons, who must use the elevator, are reluctant to do so because of the frequent breakdowns. The elevator provides access to the A level, and specific controls are needed to restrict its use by non-authorized personnel. New developments with regard to ADA compliance, safety, sound mechanical operation, lighting and high frequency use make the replacement of the elevator imperative.

**PHYSICAL PLANT - NEWARK**

**UPGRADE METASYS CONTROLS (DIGITAL)**

LOCATION: NEWARK - ALL BUILDINGS

Dept Priority: 3  
Project ID: 75B480  
Project Type Code: A02  
Project Type Description: Preservation-HVAC

| General | $1,500 | $1,500 | $0 | $0 | $0 | $0 |
| Sub-Total | $1,500 | $1,500 | $0 | $0 | $0 | $0 |

**Operating Impact:**  
Increase: $0  
Decrease: $50

Existing building thermostats are 30 years old and have exceeded their serviceable life. Replace existing room thermostats with digital controls mapped to the Metasys System.

**PHYSICAL PLANT - NEWARK**

**EXTERIOR EXPANSION JOINT REPLACEMENT**

LOCATION: NEWARK-MEDICAL SCIENCE BLDG.

Dept Priority: 3  
Project ID: 75B486  
Project Type Code: A04  
Project Type Description: Preservation-Roofs & Moisture Protection

| General | $800 | $0 | $0 | $0 | $0 | $0 |
| Sub-Total | $800 | $0 | $0 | $0 | $0 | $0 |

**Operating Impact:**  
Increase: $0  
Decrease: $0

The expansion joints/caulking are original to the facility and have begun to spring open throughout. Failure to replace/repair will and has resulted in outside air infiltration throughout the building, which increases the possibility of freeze-ups and floods during extreme weather conditions.

**PHYSICAL PLANT - NEWARK**

**MEDICAL/LAB AIR SYSTEM REPLACEMENT**

LOCATION: NEWARK-DENTAL SCHOOL

Dept Priority: 3  
Project ID: 75B487  
Project Type Code: A03  
Project Type Description: Preservation-Critical Repairs

| General | $220 | $0 | $0 | $0 | $0 | $0 |
| Sub-Total | $220 | $0 | $0 | $0 | $0 | $0 |

**Operating Impact:**  
Increase: $0  
Decrease: $0

The system is a Nash Duplex system, which is original to the building and has exceeded its serviceable life span. At the time of installation, Nash Pump Co. was the sole source for Oil Free Medical Air Compressors. Since that time, manufacturers have developed more serviceable/cost effective units that allow for campus standardization. Failure would disrupt research operations at the Medical Science Building and limit backup capabilities at the University Hospital. The cost of repair for a single compressor/component failure will result in 25% - 40% of replacement cost.

PHYSICAL PLANT - STRATFORD

ROOF REPLACEMENT
LOCATION: CAMDEN CAMPUS - E&R BUILDING

Dept Priority: 1
Project ID: 75B411
Project Type Code: A04 Project Type Description: Preservation-Roofs & Moisture Protection

| General: | $300 | $300 | $0 | $0 | $0 | $0 |
| Sub-Total: | $300 | $300 | $0 | $0 | $0 | $0 |

Operating Impact: Increase: $0  Decrease: $0
The existing roof will be 25 years old and past its useful life. Failure of the roof system will affect occupants of the upper floor; residual water can cause additional damage and mold.

PHYSICAL PLANT - STRATFORD

RESURFACE DRYVIT
LOCATION: STRATFORD-UDP BUILDING

Dept Priority: 2
Project ID: 75B399
Project Type Code: A03 Project Type Description: Preservation-Critical Repairs

| General: | $130 | $130 | $0 | $0 | $0 | $0 |
| Sub-Total: | $130 | $130 | $0 | $0 | $0 | $0 |

Operating Impact: Increase: $0  Decrease: $0
The exterior dryvit panels are badly worn and need to be resurfaced, sealed and caulked to prevent water infiltration which will cause interior damage and mold.

PHYSICAL PLANT - STRATFORD

REPLACE FIRE ALARM/SECURITY SYSTEM
LOCATION: CAMDEN CAMPUS - E&R BUILDING

Dept Priority: 2
Project ID: 75B408
Project Type Code: B02 Project Type Description: Compliance-Fire Safety

| General: | $300 | $300 | $0 | $0 | $0 | $0 |
| Sub-Total: | $300 | $300 | $0 | $0 | $0 | $0 |

Operating Impact: Increase: $0  Decrease: $0
The fire alarm system is over 21 years old and has reached its serviceable life. Parts may no longer be available for replacement. The system needs to be replaced before parts are no longer available, otherwise, it would create a compromised life safety system.
University of Medicine and Dentistry

Agency Capital Budget Request (000's)

<table>
<thead>
<tr>
<th>TOTAL COST 7 YR PROG</th>
<th>REQUESTED FY - 2008</th>

VIVARIUM HVAC SYSTEM
LOCATION: CAMDEN CAMPUS - E&R BUILDING

Dept Priority: 2
Project ID: 75B410
Project Type Code: A02 Project Type Description: Preservation-HVAC

| General: | $450 | $450 | $0 | $0 | $0 | $0 |
| Sub-Total: | $450 | $450 | $0 | $0 | $0 | $0 |

Operating Impact: Increase: $0 Decrease: $0
The vivarium air distribution system does not adequately distribute supply and return; both air handlers and duct work need to be upgraded. The system is greater than 20 years old. The present condition compromises the environment for research animals.

PHYSICAL PLANT - STRATFORD

FUME HOOD REPLACEMENT
LOCATION: CAMDEN CAMPUS - E&R BUILDING

Dept Priority: 2
Project ID: 75B412
Project Type Code: A02 Project Type Description: Preservation-HVAC

| General: | $400 | $400 | $0 | $0 | $0 | $0 |
| Sub-Total: | $400 | $400 | $0 | $0 | $0 | $0 |

Operating Impact: Increase: $0 Decrease: $0
The fume hoods are greater than 20 years old and do not have the required face velocities for safe operation. These hoods may be a safety hazard.

PHYSICAL PLANT - STRATFORD

EMERGENCY POWER
LOCATION: CAMDEN CAMPUS - E&R BUILDING

Dept Priority: 2
Project ID: 75B413
Project Type Code: A01 Project Type Description: Preservation-Electrical

| General: | $100 | $100 | $0 | $0 | $0 | $0 |
| Sub-Total: | $100 | $100 | $0 | $0 | $0 | $0 |

Operating Impact: Increase: $0 Decrease: $0
There is no additional emergency electrical distribution panels/circuits to accommodate any additional equipment in the research laboratories. As researchers are hired, there is no additional emergency power utility.
PHYSICAL PLANT - STRATFORD
REPLACE TERRAZZO FLOOR
LOCATION: CAMDEN CAMPUS - E&R BUILDING
Dept Priority 2
Project ID: 75B414
Project Type Code: A06 Project Type Description: Preservation-Other

<table>

<td>$0</td>
<td>$0</td>
<td>$0</td>
</tr>
</tbody>
</table>

**Operating Impact:**  
Increase: $0  
Decrease: $0

The air-handling unit that serves the laboratory area cannot deliver more air than it is currently delivering; the air changes in the laboratory range from 4 to 6 air changes per hour (ACH). The current Laboratory Guidelines published by EOHSS require a minimum of 10 ACH and no recirculated air from the laboratories; the current configuration recirculates laboratory air. The air handler, cooling coil (with the present chiller) and VAV boxes are inadequate for future laboratory: research, programs or renovations. The laboratory systems cannot accommodate any future research programs without adverse safety effects to building occupants.

### PHYSICAL PLANT - STRATFORD

**CHILLER REPLACEMENT**

LOCATION: CAMDEN CAMPUS - E&R BUILDING

Decrease: $0 |

A new multi-purpose facility, constructed in a phased approach to meet current and projected demand - providing much needed instructional, research, academic and technical support space for a growing array of disciplines and multi-disciplinary areas of activity. Such disciplines, (in cooperation with other universities, public agencies and private enterprise), will include Health and Life Sciences, Telecommunications, Urban Infrastructure and Information Sciences.

</table>
| This project would replace air distribution systems, air handlers, duct work, domestic hot water, dampers and heat exchangers and controls in designated buildings. Replacement is necessary as these systems have reached the end of their useful life and repair is no longer a viable option. If this project is not funded as requested and if the University cannot fund the project, it will result in further deterioration which will cost more in the future to repair/replace and operate. Additionally, the Rowan vision, which encompasses all aspects of University life, will not be realized.

</table>
| This project would upgrades to the existing electric sub-station transformers and switchgear. It will provide the necessary capacity for current use as defined in Rowan University's vision plan. If this project is not funded as requested and if the University cannot fund the project, it could result in the unscheduled failures on our power grid. Additionally, the Rowan vision, which encompasses all aspects of University life, will not be realized.

To comply with the Americans for Disabilities Act, elevators would be retrofitted, ramps provided, special hardware installed and restroom facilities modified. The estimate was calculated after a full facility audit conducted in 1992. If this project is not funded as requested and if the University cannot fund the project, it could result in our inability to provide access for all students to our facilities. Additionally, the Rowan vision, which encompasses all aspects of University life, will not be realized.

### COMPLIANCE - FIRE AND LIFE SAFETY

Fire and life safety upgrades are necessary for designated buildings to comply with NJ Uniform Fire Code. The upgrades will include the installation of fire suppression and fire detection systems. Funding is required in order to comply with a notice of violation issued by DCA, Division of Fire Safety. If this project is not funded as requested and the University cannot fund the project, it will result in non-compliance and fines being levied by other State agencies. Additionally, the Rowan vision, which encompasses all aspects of University life, will not be realized.

**Operating Impact:** Increase: $0  
Decrease: $15

Infrared testing has revealed certain roofs require repair or replacement. If done expeditiously, the life expectancy of certain roofs can be preserved. If this project is not funded as requested and if the University cannot fund the project, it will result in further deterioration which will cost more in the future to repair/replace. Additionally, the Rowan vision, which encompasses all aspects of University life, will not be realized.

#### ROWAN UNIVERSITY

**CONSTRUCT A NEW ELECTRICAL SUBSTATION**

**Operating Impact:** Increase: $0  
Decrease: $0

The construction of this new substation on the south campus is required to support new construction on this side of the campus. It will supply power to the entire south campus enabling the existing sub-station to power current new construction and anticipated construction on the north campus. Failure to construct this substation will result in the cancellation of these projects listed in Rowan Universities Maser Plan. Additionally, the Rowan vision, which encompasses all aspects of University life, will not be realized.

#### ROWAN UNIVERSITY

**LINDEN HALL CONVERSION**

LOCATION: ROWAN UNIVERSITY

**Operating Impact:** Increase: $0  
Decrease: $0

Conversion of Linden Hall from current use as administrative space back to the original use as dormitory space. The conversion is required to accommodate existing demands on the residential program of Rowan university. If this project is not funded as requested and if the University cannot fund the project, it will result in fail to attract and accommodate new students based on available resources; i.e. housing demands. Additionally, the Rowan vision, which encompasses all aspects of University life, will not be realized.

</tr>
</tbody>
</table>

**Operating Impact:**

- Increase: $850
- Decrease: $0

The construction of new 400 and 300 bed facilities, approximately 150,000 square foot each. Residential dormitory space is needed to help reduce the overcrowding we are experiencing on the campus today. If this project is not funded as requested and if the University cannot fund the project, it will result in failure to attract new students based on overcrowded conditions in University housing. Additionally, the Rowan vision, which encompasses all aspects of University life, will not be realized.

### ROWAN UNIVERSITY

**WILSON HALL EXPANSION/ADDITION**

LOCATION: ROWAN UNIVERSITY

- Dept Priority: 15
- Project ID: 75D056

</tbody>
</table>

**Operating Impact:**

- Increase: $157
- Decrease: $0

This project would construct a 75,000 square foot addition to Wilson Hall. This expansion is needed to relocate the Dance Department to the same building as the College of Fine and Performing Arts and provide a state-of-the-art facility. The current facility is located on the other side of campus and is in barely adequate condition. Furthermore, whenever a performance or recital is given, all students must relocate to another building. If the project is not funded as requested and if the University cannot fund the project, it will result in failure to attract new students based on availability of resources; i.e., needed academic and/or support space. Additionally, the Rowan vision, which encompasses all aspects of University life, will not be realized.
ROWAN UNIVERSITY

NEW EDUCATION BUILDING
LOCATION: ROWAN UNIVERSITY

Dept Priority 16
Project ID: 75D052
Project Type Code: E02 Project Type Description: Construction-New

General: $28,500 $28,500 $0 $0 $0 $0
Sub-Total: $28,500 $28,500 $0 $0 $0 $0

Operating Impact: Increase: $338 Decrease: $0

The construction of this 75,000 square foot academic classroom and office building will relieve the demand in specialized University classrooms that affects their ability to prepare students for specialization and advanced degrees are not available in the current facility. If this project is not funded as requested, and if the University cannot fund the project, it will result in failure to attract new students based on availability of resources; i.e., needed academic and/or support space. Additionally, the Rowan vision, which encompasses all aspects of University life, will not be realized.

ROWAN UNIVERSITY

LAND PURCHASE
LOCATION: HARRISON TOWNSHIP RT.55 & 322

Dept Priority 17
Project ID: 75D053
Project Type Code: D01 Project Type Description: Acquisition-Facilities

General: $12,000 $12,000 $0 $0 $0 $0
Sub-Total: $12,000 $12,000 $0 $0 $0 $0

Operating Impact: Increase: $0 Decrease: $0

The purchase of 400+ acres will expand the area for Rowan University to relocate athletic facilities off the main campus. This will provide needed space for additional academic and residential building on the main campus. In addition, land is needed for the recently awarded Technology Center. If this project is not funded as requested and if the University cannot fund the project, it will result in failure to attract new students based on availability of resources; i.e., needed academic and/or support space. Additionally, the Rowan vision, which encompasses all aspects of University life, will not be realized.

ROWAN UNIVERSITY

INSTALL EXTERIOR LIGHTS, EMERGENCY PHONES, FENCING
LOCATION: CAMPUS-WIDE

Dept Priority 18
Project ID: 75D013
Project Type Code: A01 Project Type Description: Preservation-Electrical

General: $725 $250 $200 $150 $125 $0
Sub-Total: $725 $250 $200 $150 $125 $0

Operating Impact: Increase: $1 Decrease: $0

Installation of new walkway lights and emergency telephones and fencing at specified locations would provide for increased safety for students and faculty. If this project is not funded as requested and if the University cannot fund the project, it will result in the Rowan vision, which encompasses all aspects of University life, will not be realized.

This project will actually consist of a series of projects spaced over 10 years. The University has retained a landscape architect who has significant experience in developing plans for major Universities and Colleges across the nation. As a result of the plan developed for Rowan, a series of projects will be undertaken to deal with pedestrian walkways and circulation, vehicular circulation, plant materials, lights, tree program, entrances, irrigation systems, campus focus and especially dealing with Route 322, a state highway splitting the campus in half, regarding crossing points and visual enhancement. Failure to fund this project will retain Rowan in the status quo and will not allow the institution to progress and beautify itself resulting in a possible loss of students during recruitment. If this project is not funded as requested and if the University cannot fund the project, it will result in further deterioration which will cost more in the future to repair/replace and operate. Additionally, the Rowan vision, which encompasses all aspects of University life, will not be realized.

#### ROWAN UNIVERSITY

#### REPLACE SEWER LIFT STATIONS - VARIOUS AREAS

| LOCATION: CAMPUS-WIDE | | | | | |
| Dept Priority: 20 | | | | | |
| Project ID: 75D015 | | | | | |
| Project Type Code: A06 | Project Type Description: Preservation-Other | | | | |

| Sub-Total: | $500 | $100 | $100 | $100 | $200 | $0 |

Operating Impact: Increase: $0 | Decrease: $0

Specified sewage lift stations would be replaced to provide for proper sewage ejection. The identified stations are at the end of the useful life at Westby, Cassady, Bunce and the Triad. The stations’ ages range from twenty four (24) to thirty (30) years old. If this project is not funded and if the University cannot fund the project, it will result in further deterioration which will cost more in the future to repair/replace. Additionally, the Rowan vision, which encompasses all aspects of University life, will not be realized.

Sub-Total

| Sub-Total | $1,650 | $1,650 | $0 | $0 | $0 | $0 |
|----------------------|---------------------|---------------------|---------------------|---------------------------|------------------------|

Operating Impact:  Increase:  $0  Decrease:  $1

Hollybush, the home of the University President, was built in 1849 and has systems in need of replacement not only due to poor operation but also needs to meet current building codes. This project will consist of replacing the wiring throughout most of the building, providing selective structural and foundation repairs, update steam heat with water heat and replace some plumbing. In conjunction with the electrical wiring upgrade, telecommunications wiring will be run simultaneously. Finally, central air conditioning will be added and the roof will be replaced. An elevator and additional bathroom facilities will be installed for ADA compliance. The interior of the building will be painted to match design period colors. If this project is not funded as requested and the University cannot fund the project, it will result in further deterioration which will cost more in the future to repair/replace. Additionally, the Rowan vision, which encompasses all aspects of University life, will not be realized.

This project will remove or encapsulate pipe insulation containing asbestos. In addition, removal of floor, ceiling, wall and roofing material will be replaced with the appropriate material. If this project is not funded as requested and if the University cannot fund the project, it will result in non-compliance and fines being levied by other State agencies and further deterioration, which will cost more in the future to repair/replace and operate. Additionally, the Rowan vision, which encompasses all aspects of University life, will not be realized.

This project consists of replacing two telephone switches, the associated telecom closet equipment and cabling in the buildings and network electronics to accommodate a voice over IP system. Failure to fund this project would eventually result in a total communications break-down. If this project is not funded as requested and if the University cannot fund the project, it will result in failure to attract new students based on availability of resources. Additionally, the Rowan vision, which encompasses all aspects of University life, will not be realized.

All of the athletic facilities currently on the main campus, will be relocated to this site. This move will provide adequate space for these programs as well as free up needed space for the building program outlined in Rowan's Master Plan. If this project is not funded, Rowan will not be able to realize it's vision as outlined in our current Master Plan. Additionally, the Rowan vision, which encompasses all aspects of University life, will not be realized.

Operating Impact: Increase: $0  Decrease: $0

This building has been problematic with regard to indoor air quality issues in providing a quality learning environment. A complete HVAC retrofit will be complete along with the replacement of all of the mechanical equipment and architectural finishes. The building will then be outfitted to meet the needs of the University as outlined in the master plan. If this project is not funded as requested and if the University cannot fund the project, it will result in further deterioration which will cost more in the future to repair/replace and operate. Additionally, the Rowan vision, which encompasses all aspects of University life, will not be realized.

CONSTRUCTION NEW TECHNOLOGY CENTER
LOCATION: ROUTE 322 AND 55

Dept Priority: 35
Project ID: 75D071
Project Type Code: E02  Project Type Description: Construction-New

General: $12,000  $12,000  $0  $0  $0  $0  $0
Sub-Total: $12,000  $12,000  $0  $0  $0  $0  $0

Operating Impact: Increase: $200  Decrease: $0

The state has awarded Rowan University money to construct a Technology/Business Incubator Center. The center will provide a site for companies to pursue the commercialization of products they have created as well as give rowan faculty and students the space to conduct more federal- and stated-funded research projects. If this project is not funded as requested and if the University cannot fund the project, it will result in the University not meeting its obligation to take a leadership role in the economic development of the region it serves.

**ROWAN UNIVERSITY**

CONSTRUCT NEW BUSINESS SCHOOL
LOCATION: CAMPUS

Dept Priority: 36
Project ID: 75D023
Project Type Code: E02  Project Type Description: Construction-New

General: $11,800  $0  $0  $0  $11,800  $0
Sub-Total: $11,800  $0  $0  $0  $11,800  $0

Operating Impact: Increase: $292  Decrease: $0

Construct a 65,000 square foot building dedicated to the School of Business. This project is needed to house the current School of Business under one roof. And, to provide proper classroom space with the newest available technology. If this project is not funded as requested and if the University cannot fund the project, it will result in failure to attract new students based on availability of resources; i.e., needed academic and/or support space. Additionally, the Rowan vision, which encompasses all aspects of University life, will not be realized.

**ROWAN UNIVERSITY**

COGENERATION/BOILER RETUBE
LOCATION: HEARING HEATING PLANT

Dept Priority: 37
Project ID: 75D066
