A Thematic Overview of SERU 2013 Results:

The Student Experience in the Research University (SERU) survey provides important feedback from students about their level of satisfaction, engagement, educational achievements, goals, and the perceptions of the academic and student life environment at participating AAU institutions including Rutgers – New Brunswick. It is important to recognize that SERU responses, like many large scale student surveys, are often viewed as indirect measures of student outcomes. However, these survey responses from students still provide important empirical information about how they view their student experience at Rutgers and its components (schools, majors, etc.); these responses can assist in the effort to improve the overall student environment of the university. The SERU database also links the indirect self-reported information from the survey with more direct measures of student outcomes such as student retention, graduation and academic performance for each individual student; these additional data elements from students' academic records enrich the quality of the data that is used to measure effectiveness within the institution.

The following report includes pie charts that highlight specific information reported by students at your school, Rutgers-New Brunswick as a whole, and other participating AAU institutions. The AAU institutions that participated in the 2013 administration were the Universities of Florida, Texas, Minnesota, Michigan, Pittsburgh, Iowa, North Carolina, Virginia, Southern California, Oregon in addition to Texas A&M, Indiana, and Purdue Universities.

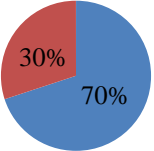

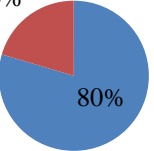

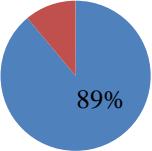

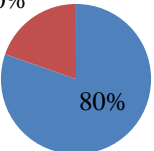

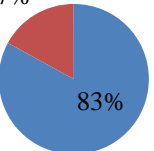

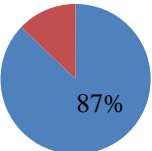

Scaled factor analyses were conducted to measure aggregate responses for a particular dimension. Quantiles of the complete set of respondents from all schools were examined to establish high, medium, and low reported levels within each dimension. A value equal or lower to the first quantile was labeled 'Low', a value equal or higher to the third quantile was labeled 'High', and all values between were labeled 'Medium'. There were a total of nine dimensions with a variety of items included in each one. In the interest of space, the number of items used in each dimension is listed along with some examples of items used. Please contact the Office of Institutional Research and Academic Planning for a complete list of items used in each dimension.

Dimension	Number of Items	Item examples
Satisfaction with educational experience	31	1) Quality of faculty instruction 2) Advising by faculty on academic matters 3) Are program requirements well defined?
Current skills self-assessment	18	1) Analytical and critical thinking skills 2) Ability to read and comprehend academic material
Engagement with studies	23	1) Interacted with faculty during lecture class sessions 2) Communicated with a faculty member by e-mail or in person
Gains in self-assessment of skills	18	1) Change in analytical and critical thinking skills 2) Understanding of a specific field of study
Development of scholarship	11	1) Raised your standard for acceptable effort due to the high standards of a faculty member 2) Extensively revised a paper before submitting it to be graded
Campus climate for diversity	17	1) Students are respected here regardless of their race or ethnicity 2) Students are respected here regardless of their sexual orientation
Academic disengagement	15	1) Partying 2) Skipped class
Quantitative skills and career orientation	5	1) Change in quantitative (mathematical and statistical) skills
Time Factor	8	1) Paid employment (include paid internships) 2) Time spent attending classes, discussion sections or labs

Finally, comparative breakout tables between an individual school and Rutgers-New Brunswick respondents across various aspects of student satisfaction, time allocation, and motivations for major selection by gender, ethnicity, and class level are reported. Breakouts by major were also reported for each individual school without the Rutgers-New Brunswick comparison.

This report was prepared by Victoria Porterfield at the Office of Institutional Research and Academic Planning. For any questions, please contact her directly at Porterfield@instlres.rutgers.edu.
